## About

Welcome to my portfolio

My name is Mikkel, and I have always had a natural interest in computers and related occupations. Currently, I am studying multimedia design at KEA. I have experience with various Adobe programs and within HTML5, CSS,JavaScript React and some Next.js. I am always eager to find the optimal solution for both parties.

## Projects

Here you can see a few of my projects I've done as part of my education at KEA.

### Foo Festival - Next.js/React App

#### About the project

I did this project on the 3rd semester as an exam assignment. We worked with UX/UI design and development of the entire app. We used Next.js/React as part of the tech stack and also Tailwind CSS.
